We are looking for a template to apply to our website

Thanks to azure WordPress it was possible to assign passwords so that the whole team could put information on the page

Add more tabs to the page while we find more information

Welcome! This is the Parker Solar satellite information page.

All the information in this page is taken from the oficial page of the NASA

With the help of wordpress azure it was possible to add our immercive ideas to the page with just a code fragment of the 3D models that the page provides us.

The screenshot shows the WordPress editor interface. On the left is a sidebar with navigation options: Escritorio, Entradas, Medios, Páginas (highlighted), Todas las páginas, Añadir nueva, Comentarios, Apariencia, Plugins (1), Usuarios, Herramientas, Ajustes, and Cerrar menú. The main editor area has a title '3D Model' and a content block containing the text '(F) full screen' and a code snippet for a Sketchfab embed. The code is as follows:

```
<div class="sketchfab-embed-wrapper"> <iframe title="PSP" frameborder="0"
allowfullscreen="" mozallowfullscreen="true" webkitallowfullscreen="true"
allow="autoplay; fullscreen; xr-spatial-tracking" xr-spatial-tracking="" execution-
while-out-of-viewport="" execution-while-not-rendered="" web-share=""

```

On the right side of the editor is a settings panel with tabs for Documento and Bloque. The Documento tab is active, showing options for Estado y visibilidad (Publico), Visibilidad (Publico), Publicar (3 de Oct. 2021 05:24), Autor (A), and a button to Mover a la papelera. Below this are sections for 29 revisiones, Enlace permanente, Imagen destacada (with a button to Establecer imagen destacada), Comentarios, and Atributos de página.
